# Perma Glass Pools of Indiana

Indianapolis, Ind.

**S**imple in shape, this rectangular pool was chosen for its low-maintenance qualities, which led the homeowner to add several features.

The idea was to keep the landscaping simple to add more interest to the effects of the pool.

The pool measures 16 by 33 feet and is 5 feet deep at its deepest point. A brick-layered spa spills

into the pool via a cascading waterfall, which is in view from inside the home, so the pool is appealing both inside and outside.

At night, perimeter lighting gives the area a unique ambiance for an evening swim or simply for relaxation purposes.

As a final addition, a pool cover was added for safety for this unfenced backyard. ▼
