

## Pool & Spa Outlet

Canonsburg, Pa.

**T**his freeform, 16-by-35-foot fiberglass pool has a gray granite Crystite pool finish, which is accentuated with navy blue ceramic perimeter tile and inlaid step tiles. In-pool fiber-optic mood lighting adds a festive touch for nighttime entertaining.

Because the customers chose this large pool to fulfill their entertainment needs, the builder oversized the pool deck and added a gazebo and patio cooking/bar area. A spa sits just off the pool deck and completes the "family fun" area. The tri-colored stamped-concrete pool deck adds an elegant touch, and its natural-stone border separates the deck area from the newly landscaped garden area.

This project presented a small problem because the builder had to construct a temporary access road to the secluded job site. Once that obstacle was overcome, the installation went off without a hitch and the customers have enjoyed many great parties around their pool since. ■
