

Pool & Spa Outlet

Canonsburg, Pa.

The builders faced a unique challenge in designing and constructing this project. The homeowners expressed their desire for a very small, yet elegant garden pool to complement their exquisite home. The pool was intended to be the focal point of the lush landscaping. Because of its unique beauty, this project has become a favorite of Pool & Spa Outlet employees.

After many consultations with the homeowners, the builder chose a compact fiberglass pool (less than 120 square feet of surface area and 200 gallons). Its freeform design made it an excellent choice. The "Pebble Beach" sandstone granite pool finish blends in well with its surroundings and is accented by exposed-aggregate concrete decking. Large pieces of natural stone were added to the decking surface to complement the natural-stone garden walls and fountain. ■

LOCATION: Canonsburg, Pa. ■ **ESTIMATED COST:** \$35,000 ■ **COMPLETION DATE:** August 2001
