

## Sandcreek Pools

Brentwood, Calif.

This large 8-foot-by-12-foot, eight-sided spa is adorned with stone-like textured earth-tone tile at the perimeter, which blends with the natural look of the flagstone decking. A bench parallels the geometric shape of the spa on one side and provides additional seating for those who wish to cool down. The built-in steps and seats in the spa are highlighted with inlaid 1-inch-square tiles, which are designed for safety, but like a set of gleaming sequins on an evening gown, add an elegant finishing touch.

Complementing the perimeter and inlaid tile, the spa's surface is coated with a sand color creating the rich teal shades in the spa water. The spa is outfitted with 12 jets and has a comfortable seating capacity of 10 to 12 adults. ■
