

Sandcreek Pools

Brentwood, Calif.

Aloha! The soothing sound of flowing water descending over rock formations, lush tropical foliage, and a secluded spa create the ambience of the islands in this stunning installation.

This 15-by-34-foot kidney-shaped fiberglass pool features a convenience ledge in the deep end and built-in steps for easy entrance in the shallow end. The pool's natural-color finish produces the delightful reflecting interplay of aqua green hues in the water.

Rock and concrete decking surround the pool, encircling its smooth undulating surface with solid texture and pattern, and accenting this water paradise with contrast. At night, perimeter and landscape fiber-optic lighting highlight the pool's abundant tranquil scenery. ■

LOCATION: Brentwood, Calif. • **ESTIMATED COST:** \$68,000
