

Viking Pools of Redding

Redding, Calif.

Designed to blend well with the Mediterranean architecture of the house, this 16-by-38-foot freeform pool is trimmed with a salmon-colored gem-textured perimeter tile. The deck design harkens back to ancient Rome, suggesting the stone-slab walkways common in the villas of antiquity.

The shallow end of the pool is 3 feet, 6 inches deep with built-in steps for easy access. The deep end, which is 6 feet deep, features a built-in seat, and a convenience ledge circles around the pool's perimeter. The pool's surface features a sparkling granite finish, which creates a stunning effect in the water — particularly at night, when this installation's perimeter and landscape fiber-optic lighting illuminates this stylish residence. ■
